

The figure displays a scatter plot of data points (blue circles) and a green step function line. The line is labeled with values 1.000, 0.000, and -1.000, indicating a classification boundary. The data points are distributed across the plot, with a higher density in the upper-left and lower-right regions. The green line starts at a value of 1.000 on the left, drops to 0.000 in the middle, and then drops to -1.000 on the right, forming a step function.
